

LIVE SINCE MAY 2026

INDEPENDENT EYE CLINIC · KANSAS

The exceptions all used to be hand edits. Now each one takes a single step.

~~5 hand edits~~ 1 click

to cancel an approved request: it clears the day, fixes the balance, removes the calendar event and can tell the employee

7 steps to 1 dialog

for a sick day entered after the fact

4 parts to 1 step

to set up a new hire

BEFORE

1 Delete the request row

2 Erase the grid cell

3 Erase the log line

4 Refresh the totals

5 Delete the calendar event

AFTER

PTO Admin

Add Manual Entry

Refresh All Totals

Add Employee

Archive Employee

Cancel PTO Request

All five, in one click

Before

BY HAND

Missed days A sick day entered after the fact took seven hand steps, and one missed step left a balance wrong

New hires A new sheet, a copied template, a roster edit and a form edit

Records Every employee record had grown its own layout over the years

After

PTO ADMIN MENU

Missed days One dialog updates the same records an approval does

New hires Added in one step, and departures archived in one step

Records All 26 moved onto one layout and checked cell by cell

Built carefully. It lives as a menu inside the sheet the office already works in. One approach, a formula that would have let totals drift without warning, was caught in review and never shipped, and every change is checked by the same test suite before it touches a real record.

Stephens AI. We diagnose where practices can save time and increase profit, then build the solutions that get them there.
