

● WICHITA FAMILY VISION · WICHITA, KANSAS · FRONT DESK

● IN DAILY USE SINCE AUGUST 2026

Every front desk question used to land on the office manager. **Now the answer is one search away.**

FRONT DESK TIME BACK

~200 hours a year

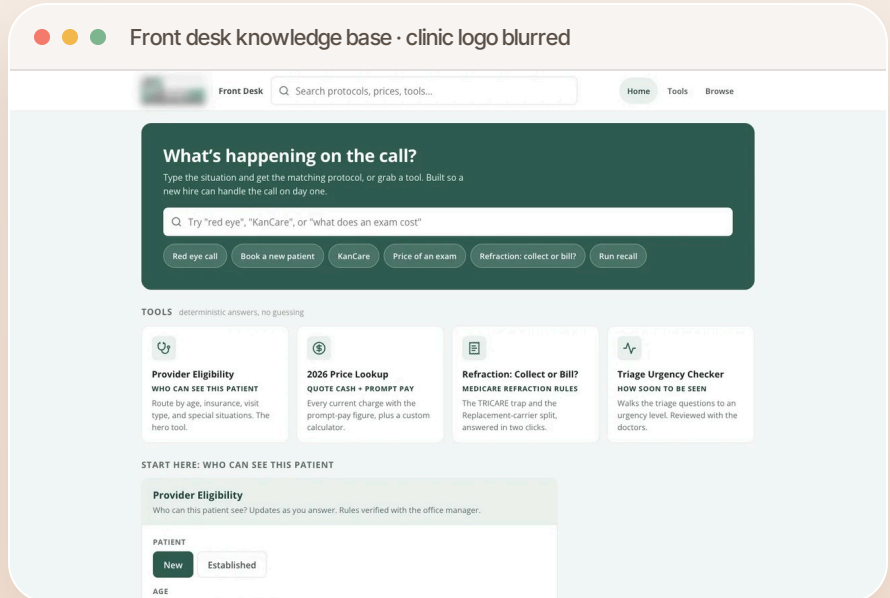

Estimated from the clinic's own numbers and kept on the low side.

~\$15,000 a year

counting new hires trained months sooner

35 pages, 4 decision tools

written from the clinic's own files

BEFORE

- Answers spread across 15 spreadsheet tabs, a scheduling document, a per-doctor rulebook and one manager's memory
- A question on a live call meant ten minutes of digging or a patient on hold
- About six months before a new hire stopped asking
- Four price lists stacked in one sheet, nobody sure which was live

AFTER

- One app on every front desk screen: 35 pages, 7 sections, one live price list
- Type the situation and get the clinic's own answer in seconds
- New hires look it up instead of interrupting someone
- Two managers keep it current themselves, with one-click undo

"This is highly valuable, both in the short term and long term. It's already saving a lot of time."

Jill Romines, Front Office Manager, Wichita Family Vision

How we got the numbers. About four questions a day that took ten minutes of digging now take one search: about 200 hours a year, roughly \$4,500 in pay. Cutting training time in half for two or three hires a year adds \$8,000 to \$12,000.
