LIVE SINCE MAY 2026

INDEPENDENT EYE CLINIC · KANSAS

Time off used to run on paper slips and a notebook. Now a request takes one tap on a phone.

~~15 to 20 min~~ **One tap**

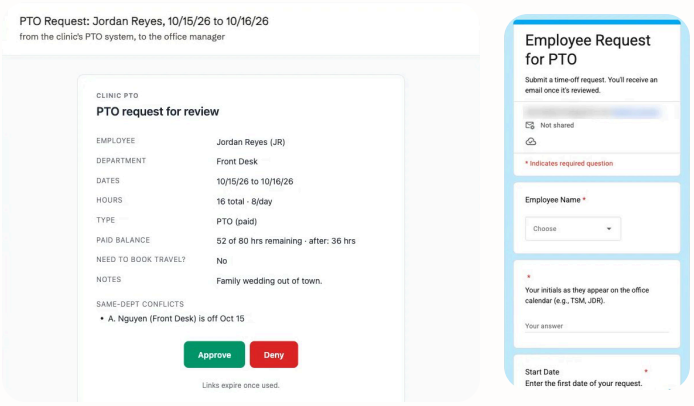

per request: before, the manager and payroll together spent 15 to 20 minutes; now the manager reads one email and taps

60 to 100 hours a year

handed back to the office

26 employee records

moved into the new system and checked, with a 22-check test suite

The real approval email and request form, with sample data.

Before

BY HAND

Asking	A paper slip filled out and handed over in person
Checking	The manager looked up the balance and the calendar by hand, every time
Payroll	Approved slips sat in a notebook until payroll, then got keyed in one by one

After

TIME OFF SYSTEM

Asking	**A short form from any phone or office computer**
Checking	**The approval email already shows the balance before and after, plus any coverage conflict**
Payroll	**One tap updates the attendance record and calendar, and a payroll sheet lands every pay period**

"It is already saving me some time, and I am getting information back to the team much quicker."

Gabe Walsh, Office Manager

How we got the numbers. The before figure is the practice's own, written down when the process was scoped: 15 to 20 minutes per request, about 10 to 12 requests a pay period. The after figure is the manager's part: read one email, tap once. It all runs on office software the practice already had, with no new logins.

Stephens AI. We diagnose where practices can save time and increase profit, then build the solutions that get them there.
